

## **Low Vision Center**

Mesa County Libraries

Central Library

530 Grand Avenue; Grand Junction, CO

970-243-4442

The Central Library has a Low Vision Corner for the visually impaired. The corner includes better lighting, magnifiers and an electronic magnifier (CCTV). Patrons may also check out a MonoMouse. The MonoMouse looks like a larger computer mouse, but its lightweight, large structure allows it to easily be used by arthritis sufferers. Our Low Vision Corner has comfortable seating and is stocked with Playaways, large print books, magazines, and DVDs. We also have a directory of local resources and services for people dealing with vision impairment. Please stop by the library and make use of this helpful resource.
